“The On-Time Circus”

*Traveling Outdoor Show with Puppets,
Clowning & Live Music – Perfect for All Ages!*

HADEN, ROONEY, OLLIE, HENRI, JACK, LOUIE, & LILY - PHOTO BY GAYLE ELLIS

Technical Rider

Performance Space:

The show is toured in a trailer pulled by a car. The trailer, that doubles as the puppet stage, is 12 feet long including the tow bars, and about 6 feet wide. The car is 16 feet, so trailer and car make for an overall length of 28 feet. The trailer can be pulled into a parking lot, along a curb or onto a grassy area. I detach the trailer, and park the car elsewhere.

*the performance space needs to be 20 feet wide and around 24 feet deep. The trailer is parked 5 feet from the back of the space to create a back stage area, and there are around 12 feet in front of the trailer for the musician’s set up and the playing space.

Requirements:

- We are solar powered. If we do more than 2 shows in succession, we will need access to electricity!
- access to bathrooms and water!
- agreed upon rain contingency which could include a delay of up to an hour of the show, or a sheltered space to perform.
- agreed upon contact person on site to help us get situated with phone access.

Qualities suitable for situating the show:

- A space of at least 20’ by 25’ for audience to gather.
- Clean area for audience to sit. A tarp or blankets are a bonus.
- Shade is preferable for performers and audience on hot days.
- A picnic shelter or tent would be an asset for audience in case of rain.
- Away from loud noise distractions, and amplified music.
- Close enough to the action so that people can be attracted to the performance.!
